Experience

Freelancing | Shopify Developer

Dec 2024 – Aug 2026

- Developed custom Shopify themes from scratch or heavily modified existing ones to meet unique branding and UX requirements
- Utilized metafields and metaobjects for scalable, structured data management across product, collection, and page templates
- Implemented dynamic product filtering and search using JavaScript and Shopify's Search & Discovery app or custom logic
- Utilized GraphQL Admin API for bulk operations, custom apps, or dashboard integrations
- Collaborated with design and marketing teams to translate wireframes and campaign goals into functional, responsive storefronts
- Built dynamic customer-based pricing logic that hides product prices and price-related text for unverified visitors or pending customers, while displaying different pricing based on assigned customer tags or account status
- Integrated geolocation-based functionality using browser geolocation, third-party APIs, caching logic, and conditional frontend messaging based on customer location
- Created custom checkout experiences using Shopify Plus features and checkout.liquid for tailored upsells or logic
- Built dynamic cart and product-page logic for customer-specific pricing visibility, product state handling, discount messaging, final sale rules, and return-policy displays
- Built reusable components using Liquid snippets and modular schema setups to streamline theme scalability and maintenance
- Optimized storefront performance by minimizing Liquid loops, leveraging caching strategies, and reducing render-blocking assets
- Integrated third-party apps for marketing, additional store features, filters, and more
- Performed QA testing, bug fixes, and iterative updates to ensure smooth deployment and optimal user experience
- Integrated GitHub for version control, enabling collaborative theme development, structured code reviews, and rollback capabilities

iPhiTech IT and Digital Solutions Corporation | WordPress Developer

Jan 2024 – May 2024

- Built and optimized websites using WordPress (Elementor, DIVI), Shopify, and GoHighLevel.
- Integrated plugins, customized forms, and developed reusable code.
- Performed QA, bug fixes, and updates, using custom CSS as needed.
- Edited images with Photoshop; trained in Webflow.

iPhiTech IT and Digital Solutions Corporation | Web Developer Intern

Aug 2023 – Nov 2023

- Built web pages using Bootstrap, WordPress (Elementor, Oxygen Builder), and Shopify.

- Completed JavaScript course on freeCodeCamp.org.
- Developed a PHP website with full CRUD functionality.
- Performed client tasks in WordPress administrator.

Projects

Bulacan Agricultural State College
BS in Information Technology

2020 - 2024

Daily NASA Images

Sep 2024

A React App with NASA API integrated to it, accessing its daily featured image and presents it to the web, alongside with its information.
